## **“Business & Public Services Assessment Project”**

Undertaken with the specialized accreditation requirements in mind, the B&PS Division has created an assessment program that combines the P&T requirements for assessment, the accreditation requirements for demonstrating the attainment of program student learning outcomes, and the recognition that to better serve our students, we must ensure they are gaining the knowledge they will need for success in the workplace. The B&PS Assessment Program simplifies the process of assessing the provision of and the student competency in the Program Student Learning Outcomes.
