DACC Pre-Dental Assistant Advising Worksheet - 2023-2024

Frequently asked questions about repeats, exercising the Adjusted Credit Option (ACO), etc., and how they affect the Dental Assistant application.

1. A student earns a "D" or an "F" in a prerequisite and repeats the courses. How is the new grade treated in the application? The student is allowed to attempt the course one additional time to replace an "F" with at least a "C-". Of course the "C", "D", or "F" is counted into the cumulative GPA that is used for the student, not subtracted. This standard applies to a student receiving a "C", "D", or an "F" in a prerequisite course or co-requisite course.

2. A student repeats a prerequisite in which a "C" grade is earned. How is the new grade treated in the application process? See #1 above.

3. Is there a cap on the number of times a student can repeat a course before the student will no longer be considered? Only one attempt is permitted in raising the grade to a "C-" or better.

4. Is there an expiration time on prerequisites or other courses in this program?

Prerequisites must be taken within the time frame as set by the college course catalog effectiveness - 7 years on the average.

5. How is transfer work treated in my application to the program? The original grade is used if it is presented on the transcript - or the cumulative GPA if available.

6. Is the prerequisite GPA looked at alone or is it a combination of the prerequisites and the cumulative GPA? Both are looked at, points are given for prerequisite GPA and points are given for the overall college(s) GPA.

7. How does exercising the Adjusted Credit Option (ACO) affect the application? Some selective admission programs add or deduct points for exercising the ACO. This program does not. Students and advisors should, however, be aware of the overall consequences of exercising the ACO. The policy is outlined under the Academic Regulations section of the current catalog.

8. Felony/Misdemeanor Information Check with the program to learn what restrictions apply. Students are required to have a national background check performed which may limit clinical site opportunities but will not exclude students from being accepted into the program.
