Highlighted DACC college courses may be available on the APECHS campus.

*Math course sequence varies based on student math placement level and progress. See academic advisor for details.

** Students are eligible for BIOL 1130G if both freshman science courses are passed with a grade of B- or higher.

Note: Many graduate level professional health programs require applicants to complete upper-division (300+) coursework for Anatomy & Physiology. For this reason, BIOL 2210 and BIOL 2225 at DACC are not included in this pathway. Students can elect to take these courses as electives.
